E-cigs contain the same **NICOTINE** as cigarettes.

THE FACTS

E-Cigarettes

f

NICOTINE

Nicotine is an addictive substance, and almost all e-cigarettes contain nicotine. Even some products that claim to be nicotine-free still may contain the drug. For instance, initial FDA lab tests conducted in 2009 found that cartridges labeled as nicotine-free had traceable levels of nicotine.

PERCENT OF DUAL USERS

When you cut down on cigarettes—by adding another tobacco product—you may feel that you’re improving your health. This is called “dual use.” It is not an effective way to safeguard your health, whether you’re using electronic cigarettes (e-cigarettes), smokeless tobacco, or other tobacco products in addition to regular cigarettes.

This is called “dual use.” It is not an effective way to safeguard your health, whether you’re using electronic cigarettes (e-cigarettes), smokeless tobacco, or other tobacco products in addition to regular cigarettes.

The Dangers of Tobacco Products

Despite major progress over the past half-century, tobacco use continues to be the leading cause of preventable death and disease in the United States. Use of other tobacco products (OTPs), which include e-cigarettes, little cigars/cigarillos and hookah, continues to rise; yet many consumers are unaware of their risks.

Goals of SuckedIn

Educate the public about the harms of tobacco.

Reduce the number of people who start to use tobacco products.

Encourage more people to stop using these products.

Reduce the adverse health impact for those who continue to use these products.
